

EO PROFESSIONAL FRAMEWORK

Explosives Ordnance Branch

Noetic supported the Explosives Ordnance Branch, Joint Capabilities Group (JCG) to deliver the Defence Explosive Ordnance Professional Framework (DEOPF) across the entire Australian Defence Organisation.

Overview

Noetic has conducted training and workforce reviews and analysis across all three Services and Service Groups to determine and provide the entire EO workforce with the necessary skills and workforce practices to ensure the safe use of explosive ordnance. As part of this work Noetic provided support across five phases of the DEOPF Program.

Outcome

An Environmental Scan of the GWEO Enterprise provided GWEO Training System Analysis. This analysis enabled the Explosive Ordnance Engineering (EOE) Master's Degree design, EO Training design and a pilot for a Skills Framework for Joint EO Services (JEOS).
