

JP9711 CORE SIMULATION CAPABILITY DEVELOPMENT

Defence – CIOG

The Noetic team provided the CIOG-led JP9711-1 project team expertise in Defence M&S, including systems engineering. The team also provided JCG Test and Evaluation (T&E) related services.

Overview

The team was employed as part of an integrated JCTB and CIOG team working with the contractor to deliver Defence's Core Simulation Capability. Some members of the team were Defence simulation SMEs tasked to provide the CIOG-led team with simulation-enabled collective and individual training expertise as well as providing assessment of proposed contractor simulation solutions. The remaining members of the team designed and commenced implementing the project's T&E program on behalf of JCG.

Outcome

The team's analysis and T&E on the evolving and proposed future capability stages, provided detailed insight into project issues and potential problems for JCTB and JCG. The team is now works on behalf of JCG in redefining the project's scope.
